

# END TO END TOTAL WASTE MANAGEMENT SOLUTIONS

## ON-SITE MANAGEMENT

## SORTING

Segregation takes place at your facility. We supply containers and **all containers are clearly marked** to ensure proper and efficient collection.

## COLLECTION

We collect various types of waste using our technologically-advanced, GPS-equipped fleet of collection vehicles.

AVERDA offers **Total Waste Management** which includes, On-Site Waste Management, Specialised Industrial Cleaning and Sightlines.

## RECYCLING

After sorting the collected waste, we then recycle materials in order to conserve natural resources amongst many other benefits.

## SPECIAL SERVICES

High Tech equipment is used for the assessment of the pipeline infrastructure - CCTV, sonar and laser inspection.

## INDUSTRIAL CLEANING

Industrial Vacuum & Specialised tank cleaning.

## ALTERNATIVE WASTE TREATMENT

We offer a variety of alternative waste treatment such as refuse derived fuel (RDF), organic waste composting, electronic waste dismantling and recycling...

## LANDFILL

We dispose of waste in allocated facilities that are designed to operate at the highest international standards.
